### HI FLEX WHITE

CEMIX HIFLEX TILE ADHESIVE is a highly flexible, polymer modified, cement based adhesive used for most internal external wall and floor applications including bathrooms, toilets, laundries, kitchens, decks, verandahs and existing tiles. Suitable over concrete, cement renders, screeds, fibrous cement sheeting, plasterboard and CEMIX approved waterproofing membranes. In conjunction with CEMIX Self Leveller, it can be used for under tile heating applications. When using with translucent tiles, the colour of the adhesive should be taken into consideration.

### RUBBERGUARD

Rubberguard is an elastomeric 1 component waterproof membrane that has been designed for a range of undertile waterproofing applications. Based on high performance polymer technology, Rubberguard offers an easy to use 1 component membrane free of solvents and isocyanates. Rubberguard offers excellent adhesion properties over building substrates including concrete, masonry, renders, cement sheeting, wet area sheet surfaces and plaster board surfaces. Rubberguard is ideally suited as a general purpose wet area membrane.

### RUBBERFLEX

CEMIX RUBBERFLEX is a highly flexible, polymer engineered and rubber modified, cement based adhesive used for most internal external wall and floor applications including bathrooms, toilets, laundries, kitchens, decks, verandahs and existing tiles. Suitable over concrete, cement renders, screeds, fibrous cement sheeting, plasterboard and CEMIX approved waterproofing membranes. In conjunction with CEMIX Self Leveller, it can be used for under tile heating applications. When using with translucent tiles, the colour of the adhesive should be taken into consideration.

**In a hurry? Try our Rapid Setting Rocket Adhesive which is suitable for both floors and walls, inside and outside.**
